

MOBILE BOAT HOIST INSPECTION PROGRAM

Marine Travelift has developed a comprehensive inspection program to support every boat hoist we sell. Our field service team is able to inspect your boat hoist and provide detailed recommendations to keep your boat hoist in top operating condition.

Why Inspect Your Mobile Boat Hoist?

- ▶ Increase the value of your machine and extend the life of your investment.
- ▶ Increase the reliability and dependability of your machine and your investment, while saving you costly downtime and scheduling conflicts.
- ▶ Show customers your commitment to their needs by being proactive and maintaining a reputation of a quality operation.

You can trust the Marine Travelift experts to deliver convenient inspection services and gain a genuine peace of mind knowing you are getting the best support from our highly dedicated service team of lifting professionals backed by your local dealer support team.

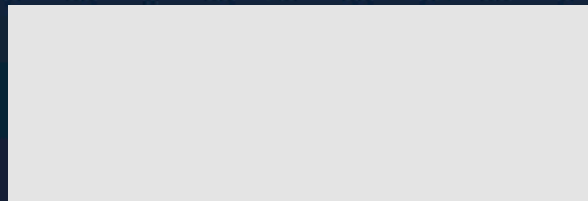

The Best CustomerCare and Support in the World. *Standard.*

What's the point of having the world's best mobile boat hoist if you can't operate it for lack of parts or service? Good service and support shouldn't be an option. That's why Marine Travelift has developed a comprehensive program to support every boat hoist we sell with the best in parts, service, technical training and support. No matter where you are in the world, there's a Marine Travelift dealer and service team ready to provide you with the parts and service you need to get your boat hoist back in operation with a minimum of downtime.

MOBILE BOAT HOIST INSPECTION PROGRAM

INSPECTION SERVICES

Join marina and shipyard owners alike who have come to trust in Marine Travelift's Inspection Services to keep their machines in peak operating condition. Marine Travelift's signature inspections are completed by highly trained in-house factory technicians who will perform a multi-point inspection of your machine. Call or email to arrange for a factory technician to visit your location today!

A sample of inspected items includes:

- Cables (wire rope)
- Chains
- Fluid Levels
- Performance (Speeds)
- Pressures
- Safety Items
- Slings
- Rigging
- Steering Alignment
- Structural Bolt Torques
- Structure
- Tires
- And More...

The inspection is followed up with a detailed report outlining the recommended areas needing attention including a parts and service quotation if required. Any maintenance or replacement parts authorized by the yard are then scheduled for a future repair date and given a one-time discount. Upon completion of all parts and service work, the yard will receive an approved inspection decal for each machine.

Call or Email Today!

OPTIONAL INSPECTION SERVICES

In combination with our signature Inspection Services, the following optional services are available.

Option 1: Preventative Maintenance 1
