- ④ LARGER SHACKLES & PIN
- ⑤ INNOVATIVE STITCHING – DURABILITY
- ⑥ STANDARD NEW FLAP
- ⑦ IMPROVED KEEL & CHINE PADS

MARINE  TRAVELIFT®

HIGHEST SAFETY RATING

We lead the industry in safety ratings with a 75,000lb lift capacity, ensuring longer sling life.

MORE FINGERS

Seven finger design offers more durability and strength with longer eyes for easier pin insertion.

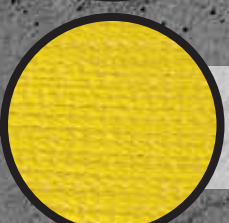

100% CORDURA WRAP

Cordura protected fingers/eyes offer abrasion resistance for longer life and increased performance.

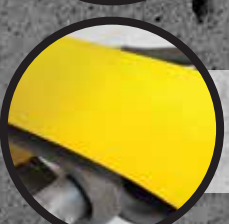

LARGER SHACKLES & PIN

Proper sized shackles and pin design for a higher safety factor and a longer life.

INNOVATIVE STITCHING

Our unique double parallel stitching runs with the load pull for durability and meets ANSI and WSTDA standards.

STANDARD NEW FLAP

Standard sewn-in flap protects fingers from the vessel and protects the vessel from the disconnect pin.

IMPROVED KEEL & CHINE PADS

Our new keel pads have sewn-in weights to increase submersibility and our rubber-reinforced chine pads help prevent chafing and abrasion for longer life.

THE CHECKLIST SAYS YES!

No-one comes close to the durability, safety, and performance of our original slings. If you own a Marine Travelift, why compromise your operation and your reputation by utilizing an imitation brand? We exclusively sell our NYLON & POLYESTER slings with 7 LARGER FINGERS for strength and ease of operation. All sling lengths, shortening eye options, and keel and chine pads can be made to order to meet all customer needs. Call today to discuss a replacement or upgrade sling option for your Marine Travelift and take advantage of our competitive pricing and short lead times. See Marine Travelift website for Sling Safety Bulletin.
